Brief description of contents

Miscellaneous improvements

- Updating a Person's item by profession
- Stock valuation - Cost Prices per period and branch
- New UDFs in Services

1. Miscellaneous improvements

1.1 Updating a Person's activity by profession

A new possibility was implemented in the Person entity, to prevent the **Activity** being updated by the **Profession** of the person. Until now, by manually changing the profession, the activity was automatically updated.

For example, the **Activity** of this person is "RETAIL SUPER MARKET COMMERCE, SPECIALIZED IN THE FOOD INDUSTRY":

The screenshot shows a form for a person's details. The 'Tax Office' field is a dropdown menu. The 'Profession' field is empty. The 'Activity' field contains the text 'RETAIL SUPER MARKET COMMERCE, SPECIALIZED IN THE FOOD INDUSTRY'. Below it, the 'Group member' field is a dropdown menu. At the bottom, there is a 'Main address' field.

With the default behavior of the application, by changing the **Profession** to "SUPER MARKET", the **Activity** automatically changes to "Super market":

The screenshot shows the same form as before, but the 'Profession' field now contains 'SUPER MARKET / Super market'. The 'Activity' field has been updated to 'Super market'. The 'Group member' and 'Main address' fields remain the same.

For cases where the user wants to avoid this automatic updating, a new company parameter was created in the **Contact administration** category, "Update person's activity from description" (`UpdatePersonActivityFromDescription`), with default value *True*.

When the value of the parameter is *YES*, the **Activity** of the person receives the value of their profession. When the value of the parameter is *NO*, then the **Activity** of the person if they already have a value does not receive the value of their profession.

The screenshot shows the 'General - Company parameters' window. The 'Parameters category' is set to 'Contact administration'. The table below lists the parameters.

	Parameter (description)	Parameter grouping	Parameter	Parameter value
1	Update Person's activity from description	Completed	UpdatePersonActivityFromDescription	True

Below the table, there is a note:

Code: UpdatePersonActivityFromDescription
Type: Logical
 When the parameter value is YES, the person's Object receives the value of their Profession. When the parameter value is NO, the person's Object — if it already has a value — does not receive the value of their Profession.

1.2 Stock valuation - Cost Prices per period and branch

An improvement was made in the "Cost prices per period" dialog in order to be easier to use.

By default, the *Period* field now comes empty. This way, when the user enters a Period and focus somewhere outside the field, a arrow appears to the left of the line that was just filled in. By pressing this arrow, the form with the fields for the "Cost prices per site" opens below.

Item cost prices

Fiscal year	Period	Sell-out price	Standard cost price	Desirable cost price	Budgeted cost price
2026	01 - JAN 2026	0.000000000	1.000000000	0.000000000	0.000000000
	Branch	0.000000000	1.000000000	0.000000000	0.000000000

1.3 New UDFs in Services

In the **Service** entity (*Menu > Sales > Items & Prices > Services*), 2 additional user-defined fields were added. These fields can be added to the form using the Form Designer (Ctrl + Shift + F8).

From the Entity fields, select *Entity fields > Item* and you can add Flag 11 and 12 anywhere you wish in the form.
