New features and extensions

1. Horizontal functionality

1.1. Saving Attachments to the server

In 5.13.0.3, an improvement was implemented in order to support the scenario of changing the folder where attachments are saved on the server.

This means that now, when the value of company parameter *Folder on Application Server for saving attachments* is changed, any files previously saved in another folder, due to the use of a previous value, will remain accessible.

Scenario:

1. On the server, create the **C:\Docs\2025** folder
2. In the settings of our application, go to **Configuration... > General > Company parameters > Attachment administration** and set the following parameter values:

Company parameters	Value
<i>Save attachments to server</i>	TRUE
<i>Folder on Application Server for saving attachments</i>	Folder: C:\Docs\2025

3. In a customer's page, create an Attachment, which will be saved in the folder **C:\Docs\2025\001\ESFITradeaccount\doc1.pdf**.
4. Make a new folder on the server, **C:\Docs\2026**, but DON'T delete the old one (**C:\Docs\2025**)
5. In the company parameter *Folder on Application Server for saving attachments*, change the folder of the value to the new one, that is: **C:\Docs\2026**
6. In the customer's page, Attachment **C:\Docs\2025\001\ESFITradeaccount\doc1.pdf** now opens properly.

Attachment administration			
61	Attachment category for site photos	System admi...	AttachedSitePhotoCategory SITE_PHOTO
62	Attachments: "Save to DB" default field value	System admi...	ES_ISBLOB_DEFVAL False
63	Category of automatically attached PDF files through report	System admi...	AttachedPrintedPDFDocCat... PRINT_DOCUMENT
64	Create automated code in Attachments	System admi...	ES_AUTODOCUMENT_CO... True
65	Dropbox secret	System admi...	DROPBOX_SECRET
66	Dropbox token	System admi...	DROPBOX_TOKEN
67	e-Portfolio document property	Completed	EAUDITFOLDER_DOCUME... OFFICIAL BOOK
68	e-Portfolio entry types	Completed	EAUDITFOLDER_DOCUME... 3
69	Folder on application server for saving attachments	System ad...	SRVRELATEDDOCSIPA... C:\Docs\2026
70	Maximum file size in KB for users who are not system administrators	System admi...	SRVRELATEDDOCSMAXSI... 0
71	Save attachments to server	System ad...	SRVISBLOB True
72	Save entries on the server using internal ID (GID)	System admi...	SRVISRELATEDDOCSFILE... False

Company parameters.

2. Budgets

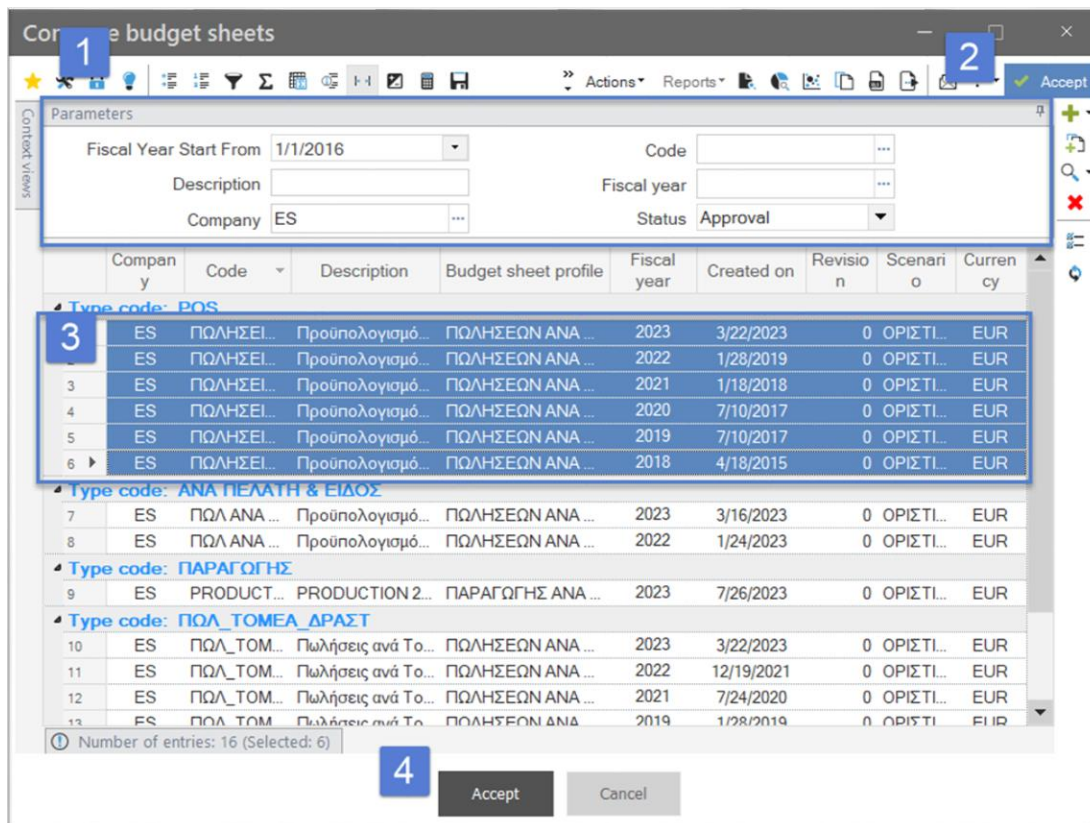

2.1 Shortcuts

The new version offers the functionality of Shortcuts in the **Budget Report** cube, in order to facilitate the user and for faster results related to budgets.

More specifically, through the *creation of a Shortcut*, the user can now select and save the view with the exact criteria (execution parameters) they wish, so that they can receive results simply and quickly.

Scenario:

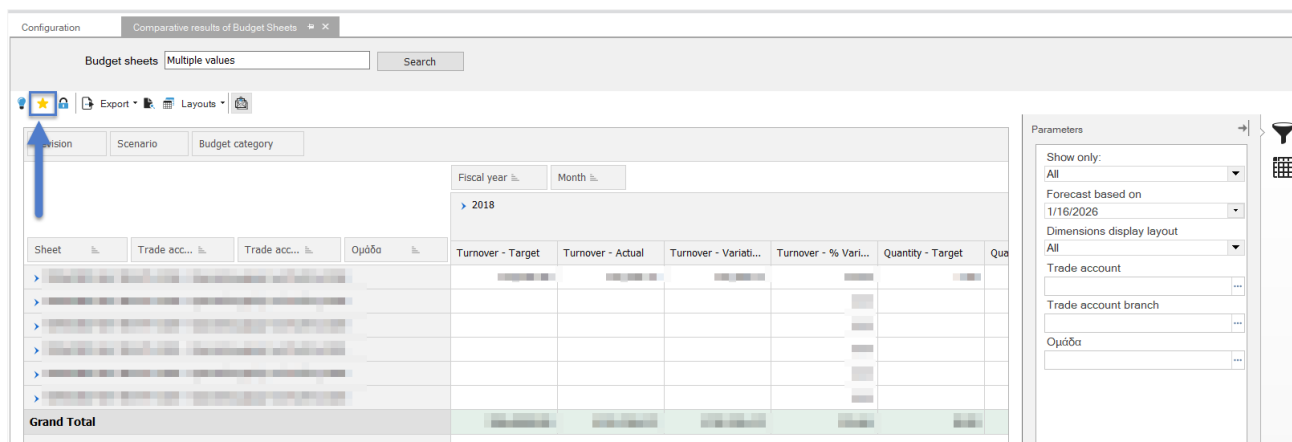

1. From the main menu, go to **Budgets > Comparative Results**.
2. Select **Search**, from the top of the page. This will open the **Compare budget sheets** window:
 - i. Firstly, set the parameters as preferred (1)
 - ii. Click on **Accept** (2)
 - iii. Select the entries you wish to compare (3)
 - iv. Click on **Accept** (4)

3. The window closes and the entries appear on the cube. By setting the parameters to the right of the screen and pressing the **Accept** button below them, the user can customize

the view as preferred, in order to display the comparative budget sheet results the way they wish.

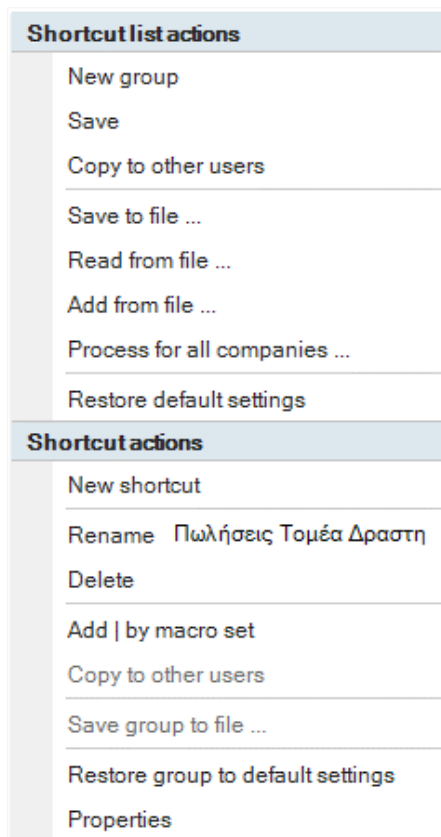

4. With the **star icon** at the top right of the screen, the user can save the view in the form of a Shortcut, which can now be used at any time, with any of the preferred filters:

Create Shortcut icon

The shortcut to view the comparative budget sheet results is saved under **Shortcuts > [your defined subfolder]**.

As with all other shortcuts in the application, all related shortcut actions such as Rename, Delete, etc. are available, by *right-clicking* on the shortcut:

Save area and Shortcut Actions.

Bug fixes

Purchases

- Fixed an issue with the incorrect deletion of selective matches that would occur when the user would automatically close quantities.

Orders - Reservations

- Fixed an issue where the closed quantity in the source document would not update when the user would match a document.

Form designer

- Fixed an issue with incorrect filtering on a specific query relating to the search for the **fLoadingaddress** field.

Accounting

- Resolved an error in the Accounting module, which would occur during the accounting allocation process, with the message "Must declare the scalar variable @ACCOUNTINGCHART".

Expenses

- Resolved an error that would occur during the mass allocation process, with the message "Incorrect syntax near the keyword 'WHERE'".

Scroll & Cube Designer

- Resolved an error that would occur while editing a specific view, with the message "The buffer cannot have a null value".

CRM Sales

- In the CRM Sales module, an issue was fixed in the task status, that would cause the correct status group values to not be displayed.

Tasks at end of period

- Fixed an issue with the incorrect deletion of documents that would occur when the user closed a fiscal year with manual inventory.
